

Annex – Features of Direct Purchase Insurance (DPI)

DPI will comprise:

- (a) Term life insurance products with Total and Permanent Disability (TPD) cover;
- (b) Whole life insurance products with TPD cover; and
- (c) Optional Critical Illness (CI) rider attached to term life or whole life insurance products
with the following features:

Features	Remarks
(a) For whole life DPI, only participating products will be offered	Non-participating products are typically not offered in the market due to poor demand and high cost.
(b) Premium payment periods for whole life DPI: <ul style="list-style-type: none"> • Up to age 70 • Up to age 85 	This will cater to consumers' preferences to either pay premiums for a shorter duration at a higher annual premium but lower total premiums; or to pay premiums for a longer duration at a lower annual premium but higher total premiums.
(c) Policy coverage period for term life DPI: <ul style="list-style-type: none"> • 5 years (with renewability feature)* • 20 years* • Up to age 65 <p>* TPD and CI benefits cover up to age 65; Death and Terminal Illness benefits cover up to age 85.</p>	This will cater to consumers with different protection needs - 5 year renewable term for consumers who prefer shorter coverage, and 20 year and term up to 65 for consumers who prefer longer coverage. Consumers can be covered up to age 85 under the 5 year (with renewability feature) and 20 year options.
(d) Maximum sum assured: \$400,000, with a sub-limit of \$200,000 for whole life DPI, on a 'per person per insurer' basis	This takes into consideration the average protection needs of Singaporeans, estimated at 10 times their annual income based on a 2012 Protection Gap Study commissioned by the Life Insurance Association, Singapore. Based on the Ministry of Manpower 2013 Comprehensive Labour Force survey, the gross median annual income of Singapore residents is about \$39,000, which will translate to protection needs of about \$400,000. The sub-limit of \$200,000 for whole life products seeks to alleviate the risk of consumers buying whole life products beyond their means and protection needs. This is because whole life products have higher premiums than term life products, and typically require a longer-term premium commitment. Policyholders who surrender their whole life policies in the early years of the policy also stand to lose a significant portion of their premium outlay.

(e) Minimum sum assured: \$50,000, regardless of term life or whole life DPI	This is in line with most term and whole life policies currently sold in the market.
(f) Maximum entry age: 65	This is based on the current official re-employment age cap.
(g) Minimum entry age: 18	This is in line with current industry practice for a life insurance policy owned by the insured. No third party policies will be offered, as these products are typically attached with a premium waiver rider. Consumers will likely require financial advice for the purchase of such products.
<p>(h) Death, terminal illness, TPD and CI benefits: 100% of sum assured, with standardised TPD definitions and 30 CIs covered**</p> <p><i>** The CI rider will pay out 10% of the coverage amount of the main policy or \$25,000 whichever is lower, for Angioplasty & other invasive treatment for coronary artery. A list of the 30 CIs covered are as follows:</i></p> <ol style="list-style-type: none"> 1. Major Cancers 2. Heart Attack of Specified Severity 3. Stroke 4. Coronary Artery By-Pass Surgery 5. Kidney Failure 6. Aplastic Anaemia 7. End Stage Lung Disease 8. End Stage Liver Failure 9. Coma 10. Deafness (Loss of Hearing) 11. Heart Valve Surgery 12. Loss of Speech 13. Major Burns 14. Major Organ/Bone Marrow Transplantation 15. Multiple Sclerosis 16. Muscular Dystrophy 17. Parkinson's Disease 18. Surgery to Aorta 19. Alzheimer's Disease / Severe Dementia 20. Fulminant Hepatitis 21. Motor Neurone Disease 22. Primary Pulmonary 	<p>The TPD benefit pay-out is consistent with current industry practice. The 30 standardised CIs are commonly offered by life insurance companies. In particular, the top 5 CIs – major cancers, heart attack of specified severity, coronary artery by-pass surgery, stroke and kidney failure account for over 90% of all severe stage claims received by life insurance companies¹.</p>
