

## Feedback on Method of Collection of Revised 610/1003

Question	Respondent
As the bank is looking to automate the generation of MAS Notice 610 returns, the bank will require the XML specification document and actual PDF templates for the IT team as well as external vendor to perform their assessment. Please advise when MAS will be providing the XML specification document (similar to MAS Notice 649) so that IT-related work can commence. This will also impact the implementation and testing timelines.	KPMG (Bank E)
Can MAS provide the XML Excel ready conversion file format for the new MAS 610 to all Banks and institutions? Banks could type the reported balances in Excel and upload directly into PDF for submission. This would greatly help smaller sized banks to minimize data input error into pdf.	DZ
It would be grateful for MAS to provide XML Spec file during issuance of the final return for our support team to set up automation.	NAB
