

MAS SUSTAINABILITY REPORT 2020/21

“This inaugural Sustainability Report brings together the efforts that MAS is undertaking through its different roles to contribute towards a climate resilient and environmentally sustainable world. We aim to lead by example, and we hope that financial institutions in Singapore and Asia will follow.”

– Ravi Menon, MAS Managing Director

Financial Sector Resilient to Environmental Risk

Strengthen the resilience of the financial system through robust risk management and disclosure practices

- Guidelines on Environmental Risk Management
- Climate stress tests for industry by end-2022
- Global sustainability disclosure standards
- Global standards development and capacity building with international counterparts

Vibrant Green Finance Ecosystem

Work with financial institutions to develop a vibrant green finance ecosystem and support Asia’s transition to a low-carbon future

- Develop markets and solutions
- Build knowledge and capabilities
- Harness technology and innovation
- Leverage industry partnerships

Climate-resilient Reserves Portfolio

Integrate climate risks and opportunities into our investment framework

- **Analysis:** Climate scenario analysis and signposting
- **Actions:** Formulate portfolio steps to mitigate climate risk and support the greening of the economy
- **Accountability:** Monitor climate risk exposures and report on progress

Sustainable Organisation

Reduce our carbon and environmental footprint to support Singapore’s broader climate ambitions and commitments

- Improve energy and water efficiency, and reduce waste
- Manage environmental impact of currency operations
- Promote a culture of sustainability
