

Project Greenprint

Using technology for efficient and trusted data flows to support Green Finance

Our Objectives

Develop a Vibrant Green FinTech Ecosystem

Scaling Green FinTech solutions beyond Singapore

Drive Partnerships and Collaboration

Enabling connections across financial sector participants, investors, green technology and solutions providers, ESG service providers, and corporates

Facilitate Trusted ESG Data Flows

Facilitating the flow of consistent, clear and reliable ESG data between the financial sector and the real economy, with access to global and sectoral data platforms

Greenprint Platforms
