

Appendix B – Bilateral Settlement Details and Processes for Repos using Category A2 and A3 Collateral in CDP

1 Repo – Obtaining SGD funds using Category A2 and A3 collateral (“Category A2/A3 Securities”)

1.1 To obtain SGD funds using Category A2/A3 Securities, the Eligible Counterparty shall enter into a Repo with the Authority. The Repo shall comprise the following transactions:

- (a) opening leg – a transaction where the Eligible Counterparty sells Category A2/A3 Securities to the Authority (the “Sale”) and receives the SGD Principal from the Authority on the Value Date; and
- (b) closing leg – a transaction where, on the Maturity Date, the Eligible Counterparty repurchases from the Authority the Category A2/A3 Securities which were transferred to the Authority pursuant to the Sale by paying the Closing Leg Settlement Amount to the Authority.

1.2 For a Repo involving Category A2/A3 Securities, the Value Date of the opening leg of such Repo falls on the Trade Date.

1.3 For the purpose of the Sale referred to in Paragraph 1.1(a), the amount of SGD Principal that the Authority will transfer to the Eligible Counterparty shall be computed based on the amount of Category A2/A3 Securities transferred by the Eligible Counterparty to the Authority (the “Nominal Amount”), as follows:

- *SGD Principal (rounded to 2 decimal places)*
$$= \text{Effective Price of Category A2/A3 Securities} \times \left(\frac{\text{Nominal Amount of Category A2/A3 Securities}}{100} \right)$$

1.4 The Effective Price of Category A2/A3 Securities shall be defined as follows:

- *Effective price of Category A2/A3 Securities (rounded to 2 decimal places)*
$$= \text{Initial dirty price} \times \left(1 - \frac{\text{Haircut}}{100} \right)$$

where the Haircut for Category A2/A3 Securities is set out in a MASNET circular or in notices transmitted via any other written communication modes stipulated in Clause 24 of the Agreement.

- *Initial dirty price (rounded to 2 decimal places) = P + AID*

where

P is the previous Business Day's¹ closing bid price of the relevant Category A2/A3 Securities as published on Bloomberg "SGDC1" and when such prices are unavailable, to be the previous Business Day's closing bid price of the relevant Category A2/A3 Securities as published by Thomson Reuters End of Day Pricing (EJV). When prices from both sources are unavailable, P will be determined by the Authority; and

AID is the accrued interest/distribution per S\$100 face value, which shall be calculated as follows,

$$AID = \left(\frac{\text{Coupon Rate}}{2} \right) * \left(\frac{N}{E} \right)$$

where

N is the number of calendar days between (a) (i) the issue date of the Category A2/A3 Securities (if no coupon has been issued) or (ii) the first day of the current coupon period of the Category A2/A3 Securities (if a coupon has been previously issued) (inclusive) and (b) the Value Date (exclusive); and

E is the number of calendar days in the current coupon period of the relevant Category A2/A3 Securities where the Value Date occurs.

- 1.5 No interest shall be payable by the Authority for any Category A2/A3 Securities transferred to the Authority to serve as collateral in relation to any Repo to obtain SGD funds under the Agreement.
- 1.6 While a combination of different issues of Category A2/A3 Securities can be used in Repos to obtain SGD funds, the Category A2/A3 Securities that are proposed to be used by the Eligible Counterparty from each issue shall have a nominal value of at least S\$5 million.

¹ For the avoidance of doubt, "Business Day" here refers to a Business Day in Singapore only.
