

TRANSITION CREDITS COALITION (TRACTION)

To develop transition credits for the early retirement of Asia's coal plants

Transition credits as a complementary financing tool

- High-integrity carbon credits generated from the emissions reduced through retiring Coal Fired Power Plants (CFPPs) early and replacing them with cleaner energy sources
- Provides additional revenue to reduce economic gap for the early retirement of CFPPs

TRACTION to develop transition credits as a viable market solution by:

1

Identifying **system-level barriers and developing solutions**, e.g. identifying robust crediting approaches, mitigating risks of project non-delivery

2

Exploring **avenues to build investors' confidence** in transition credits

3

Examining possible **standardisation of approaches** to address differing market circumstances, **incorporating insights from pilot transactions**

A whole-of-system approach needed
