Columns 1, 2 & 4 Refer to end of period.

Column 6 Charge-off rate for the year is defined as the bad debts written off during the year divided by the average rollover balance for the same year. As monthly charge-off rates tend to be too volatile, we have chosen to publish quarterly charge-off rates instead. However, there can still be seasonal variations. The quarterly charge-off rate is calculated by annualising the ratio obtained from dividing the bad debts written off for the quarter by the average rollover balance for the same quarter.

Notes : US\$ rates are the average of buying and selling interbank rates at noon. Rates for foreign currencies other than US\$ are cross rates derived from the rates of such foreign currencies against the US\$ and the US\$/S\$ rates.

Columns 11-13 Source: The Association of Banks in Singapore (ABS) - Reuters is the official and exclusive calculating agent of the ABS fixing rates.

'-' = discount. These forward swap points are the average of buying and selling of the fixing rates.

To derive the forward rate for the US\$, the forward premium/discount should be added/subtracted from the US\$/S\$ spot exchange rate.

Overdue fixed deposits as distinct from unclaimed fixed deposits are to be classified under this item.
