<p>Winning Teams</p>	<p><u>Moxtra</u> Balasubramanyam Mohan, General Manager - Products & Operations: “Moxtra is very privileged to win this prestigious award and be recognised for its solution that focuses on providing a hi-touch, personalised client engagement and collaboration for the financial services industry. We want to enable financial institutions to redefine how they deliver “mobile first” client engagement through the Moxtra solution that is embeddable, secure and auditable. The solution aims to deliver customers a great user experience, increase customer relationship value by over 150% and bank staff productivity by over 100%. This award and recognition will help us accelerate our growth not just in the region, but globally.”</p> <p><u>SQREEM</u> Ian Chapman-Banks, CEO: “SQREEM Technologies, as a Singapore based company is proud and humbled to have been the recipient of this amazing award.</p> <p>As a company, we have been focusing all our attention and resources on building a world class machine learning platform and also, we are aiming to becoming a world leader in acquiring and processing behavioural data to help solve real world problems for our finance banking and insurance clients.</p> <p>We started in Singapore and now we are expanding to the rest of Asia, UK, EU and the USA. With the help of this award, this will turbo charge our expansion.”</p> <p><u>Trunomi</u> Stuart Lacey, CEO and Founder: “Trunomi is thrilled to win this award from MAS, further recognizing the value of our global data privacy enhancing solution. Our platform unlocks the power of customer data using consent and data rights management and enables large organizations to offer their customers an easy and powerful set of tools to manage the access to and control of personal data; solving key regulatory problems and enhancing customer trust, experience and engagement. We are grateful for the expert advice and support from MAS and KPMG Digital Village in contextualizing our solution for the ASEAN market and this award and their support will help us accelerate our growth in this key region.”</p>
<p>Organisers</p>	<p><u>Chia Tek Yew, Head of Financial Services Advisory, KPMG in Singapore:</u> “The commercial viability and ease of adoption of each of the top 20 finalists was a very important criteria in this year’s Global Fintech Hackcelerator. We are already seeing the corporates in financial services taking an interest in some of their solutions, and making concrete plans to work together on pilot projects for potential implementation within their business.”</p>

	<p><u>Jan Reinmueller, Head of Digital Village, KPMG in Singapore:</u> “The true value of the Global Fintech Hackcelerator is moving the needle on corporates’ approach to fintech innovation. I definitely encourage the financial services community to study the proposals and solutions that the winners and finalists have presented, and pursue opportunities for co-innovation. In doing so, the overall industry will be addressing the challenges identified at the start of this journey, and benefitting from it.”</p>
<p>Judges</p>	<p><u>Ian Pollari, Global Co-Leader of Fintech, KPMG International:</u> “The winners of the Global Fintech Hackcelerator have demonstrated strength in the application of innovative technologies, the commercial uniqueness of product, and ability to scale beyond a single market or customer segment. The challenge now is for financial institutions to find and focus on the most executable fintech opportunities, whether it is to radically transform their business or drive incremental innovation.”</p> <p><u>Jeremy Anderson, Co-Chairman, Global Financial Services, KPMG Global:</u> “It has been an exciting day for fintech, and for myself as a judge of the Global Fintech Hackcelerator, to see how innovation is having a major impact on financial services for the benefit of customers and businesses. The depth and breadth of technologies applied, the global representation in the Hackcelerator, and the supportive environment for new technology championed by MAS, continues to place Singapore in the global spotlight for fintech.”</p> <p><u>Png Chin Yee, Senior Managing Director, Temasek:</u> “It has been an exciting morning with a fantastic line-up of finalists with solutions to real world issues.”</p> <p><u>Rajeev Kumar Gupta, SHIFT Programme Manager a.i. – ASEAN and SAARC, United Nations Capital Development Fund:</u> I’m very proud to be here as a judge. The finalists have shown us really impressive solutions that the marketplace can leverage on.</p>
<p>Mentors</p>	<p><u>Celine Le Cottonnec, Chief Data Officer, AXA Insurance:</u> “Mentoring Roameeo was an enriching experience. After the on-going pilot on road safety, we wish to integrate their innovative approach on Cognitive Assessment into our connected fleet offer for risk management. We believe it has the potential to influence positively driver behaviour. AXA always saw value in collaboration with start-ups to create unique value proposition and improve the Customer experience of our partners.”</p> <p><u>Colin Chan, Managing Director for Group Marketing, Great Eastern:</u> “We are delighted with the recognition given to our collaboration with SQREEM. At Great Eastern, we are firmly committed to helping Singaporeans</p>

bridge their protection gap. This recognition will spur us to continue our efforts to further push our digitalisation transformation and leverage technology and digital innovation to reshape the way we engage customers and create value for them.”

Vincent Teo, VP, The Open Vault @ OCBC, Fintech & Innovation Group, OCBC Bank:

“Participating in the Global FinTech Hackcelerator programme as a mentor was a great experience. Besides providing us an opportunity to plug into the wider, global FinTech ecosystem, we managed to gain exposure to innovative solution providers which we believe can help us address some of the pain points we are facing in the bank today.”

TG Ramakrishnan, Head, Digital, Singapore, ASEAN and South Asia, Standard Chartered Bank:

“Our vision is to be a digital bank with a human touch, and we are committed to nurturing the next generation of tech leaders to shape the future of banking. This mentorship programme offered a mutual exchange of ideas, provided a deeper understanding of digital platforms and facilitated the sharing of best practices across borders. This sets the path for greater synergy between financial institutions and fintechs to deliver stronger propositions and platforms for consumers.”
