

GREEN SGS (INFRASTRUCTURE) BONDS

Make sure you have considered whether the Bonds are a suitable product for you

Investments in Singapore Government Securities (SGS) bear market risk – if you sell the Bond before it matures, you may receive less than your original investment as a bond's price may rise or fall with changing market conditions.

Please review the offering circular, the public notice, the pricing notice and other information before you submit an application.

<https://go.gov.sg/mas-bonds-and-bills>

1 To apply, select the Electronic Securities Application (ESA) or Initial Public Offering (IPO) application

On your ATM screen, internet banking website or mobile banking app, select the ESA or IPO application, followed by the “SGS[xx]Y” security, where [xx] refers to the tenor of the Bonds.

Don't use the Singapore Government Securities (SGS) application – this is for SGS auctions and Singapore Savings Bonds only.

2 Calculate and key in your desired number of application units

Be careful – 1 application unit represents S\$100 in principal amount of the Bonds. For example, if you key in 1,000, it means **1,000 application units = S\$100,000** in principal amount of the Bonds!

The application must be in multiples of **10 application units (10 application units = S\$1,000** in principal amount of the Bonds).

3 Check the amount of money to be deducted before you submit the application

Once an application has been submitted, it can't be changed or cancelled!

Submit **ONE** application only. Only one application per individual (across all banks) will be accepted. Multiple applications will be rejected.
