1. Registered Customer Information

This part contains the data related to your swift.com account / BIC and is automatically pre-filled with registered information

3. Order Information

In 3.01: enter the reference that SWIFT has to use for communication related to this service (e.g. invoices). *Please note there is no cost for submitting these subscription e-forms*

4. Institution that you order for

In 4.01: Specify the BIC8 you use for MEPS+ operations (same BIC8 as the level-2 BIC8 of your Distinguished Name in field 6.01 of this e-form)

MEPS SWIFT InterAct Services Subscription

Preferred implementation date

Implementations always occur during the weekly general maintenance period between Saturday 05:00 GMT and Sunday 05:00 GMT. The earliest possible implementation of an order that is validated by SWIFT as being correct and duly approved by the Service Administrator, is the second weekend following the date of submission. A later weekend can be specified.

If you are using Lite2 or Alliance Remote Gateway the implementation date will be aligned with server provisioning (for more information please contact support).

In case of **first subscription** to a SWIFTNet service, the implementation date should concur with the next planned BIC directory publication date.

Preferred implementation date   

5.01

Please select earliest date

1. Selected Preferred Implementation Date

Please see the instruction for in 5.01

SWIFTNet Closed User Group Information

Use this section to specify the SWIFTNet Address or Distinguished Name (DN) that you will use to exchange messages or files with your counterparts for this SWIFTNet Service.

You must use this DN or any lower level DN as the Requestor-DN to send messages to your correspondents.

If you expect to receive messages as part of this service, this will also be the Responder-DN that your correspondents must use to send messages to you. They will find this destination in the SWIFTNet Services Directory (if supported by the service).

You can edit this field (or leave the default value) and select the appropriate CUG-category as defined by the Service Administrator.

SWIFTNet Address 6.01

CUG Category 6.02

Advanced >>

6.01

Participant 6.02

please select

Participant

CAS

6. SWIFTNet Closed User Group

In 6.01: The SWIFTNet Address is the Distinguished Name (DN) that is used as Requestor DN to send messages. By default, your Level-2 DN will be displayed in the e-form, **but a Level-3 DN must be specified.**

To do this please specify **your Distinguished name in field 6.01** as defined below:

ou=<live branch or "xxx">, o=<live bic8>,o=swift

In 6.02: keep the default value for 'CUG Category' - "Participant".

If participants require more DNs to be provisioned, you can click on "Advanced", update the number of entries to the number of DNs required and click on "update":

Please select the number of entries you desire (max 99)

Traffic Routing for Store and Forward Service

Use this section to identify the queue name to process incoming SWIFTNet InterAct or FileAct Store and Forward traffic. Use the default value as specified below if you do not have any specific requirements.

If you expect Store and Forward traffic from this service for both InterAct and FileAct, you must use the Advanced section below to set-up separate queues and routing rules to facilitate appropriate interface processing.

Default Queue

?

▶

swhqbebb_filelp

7.01

Advanced >>

You can decide to change the queue name or use multiple queues to process different types of messages for this service. To do this, add a line for each traffic segment you want to assign to a queue. The traffic segment can be specified by using the Requestor DN, Responder DN and Request Type. The Queue Name will be created centrally if it does not yet exist.

Note : Following queue and routing rule will be created by default : Rule Order 99, Full Queue Name bic8_generic(lp), Requestor DN *, Responder DN o=bic8,o=swift and Request Type *

Rule Order	Full Queue Name	Requestor DN	Responder DN	Request Type	
90	swhqbebb_filelp	*	*.p=swhqbebb,o=sw	*	7.02.01

Please select the number of entries you desire

1

update

 (max 99)

Delivery Notifications can be directed to any of your existing Store and Forward queues based on the configuration of your financial application. Use the following fields to request additional queue(s) if required.

Queue Name

Add

Remove

7.03

7. Traffic Routing for Store and Forward Service

In this section you are able to specify the queue for your incoming InterAct Store and Forward (SnF) messages.

In 7.01: the default value of the 'Full Queue Name' will be automatically filled in the e-form. This needs to be customized as per your own preferred SnF queue name. For further customization please click on "Advanced" and specify your own preferred SnF queue name in 7.02.01.

Please note that the Responder DN must be identical with the DN indicated under 6.01

In 7.03 you can indicate (if required, not mandatory) a separate queue (other than the SnF queue specified under 7.01 and 7.02.01) for the reception of the Delivery Notification messages.

Participants can reference their setup for the current MEPS+ SWIFT InterAct service to fill up this section.

MEPS SWIFT InterAct Services Subscription

Once the e-form has been completed scroll down and click on the “**Continue**” button for initial validation of the e-form.

If valid, then confirm your subscription request and click on “**Order now**”.

Your e-form will be further validated by SWIFT, before forwarding to MAS for approval.

Your subscription status can be monitored using the **order tracking** tool of swift.com.

Subscribing To MEPS+ WebAccess Services

MEPS SWIFT WebAccess Services Subscription

- 1. Go to SWIFT web page <http://www.swift.com>
- 2. From the main page select the option "Ordering and support".
- 3. In the Ordering page, please select "Order products and services".
- 4. Navigate to the Monetary Authority of Singapore
- 5. Select the required service and click the "Subscribe" button.
- 6. If not already logged into swift.com, enter your account and password. If the credentials/access are correct, the relevant e-order form will launch.
